**RE: HEMPHILL DIVERSION STRUCTURE FISH PASSAGE PROJECT (#7032)
CONSTRUCTION NOTIFICATION**

Dear Property Owner:

Nevada Irrigation District has contracted **Westcon Construction Corporation** for the construction of the Hemphill Diversion Structure Fish Passage Project (Project). Work is expected to start in **July 2022** and be completed in **November 2022**.

The work consists of the removal of the existing diversion structure and canal inlet; construction of a temporary bypass; installation of a roughen rock ramp fishway; construction of a new inlet, cone screen, and gate structure; and site stabilization.

The construction is within Auburn Ravine near the Hemphill Canal. Access to the site will be via Highway 193 and Virginiatown Road. At this time, we do not expect traffic delays because of this construction Project. Due to the location of the construction, we recognize that the noise may travel along the ravine. We appreciate your patience as we complete this restoration Project.

Regular working hours will be between the hours of 7:00 a.m. and 7:00 p.m., Monday through Friday, except holidays, with occasional work on Saturdays. Work hours will be adjusted as daylight decreases. There is no night work planned. Access to properties via public roads will be maintained for local residents, businesses, and emergency services (Police, Fire, Ambulatory, etc.).

Although some inconvenience may be unavoidable, we intend to do what we can to minimize whatever impact you may incur from the construction activities. During construction, please feel free to contact **Tony Moscini, Construction Inspector, 530-913-9689**, or me at 530-273-6185, extension 1215, or by email to herrera@nidwater.com if you have any questions or concerns regarding the construction. Additionally, updates will be provided on the project website at nidwater.com.

Thank you in advance for your patience and cooperation during the construction of this project.

Sincerely,

Tonia M. Tabucchi Herrera, P.E.
Senior Engineer
