RE: ALTA SIERRA RESERVOIR REPLACEMENT PROJECT #6971 – CONSTRUCTION NOTIFICATION

Dear Property Owner:

The Nevada Irrigation District is replacing the Alta Sierra Reservoir with a 3-million gallon concrete tank constructed within the existing reservoir.

The project includes removal and disposal of the existing Hypalon reservoir lining and cover, construction of the concrete tank, and installation of new piping on the reservoir site. The existing berm and vegetation will be left mostly intact with an access opening constructed on the west side facing the reservoir site. After tank construction, the landscaping and fencing along Francis Drive will be restored and improved as needed to provide screening.

The general contractor is Gateway Pacific. They are planning to work from 7:00 AM to 4:00 PM Monday through Friday. During construction, there will be truck traffic during work hours, delivering materials to the worksite. The busiest days will tend to be during concrete pours when the contractor will generally work from 6:00 AM to 5:00 PM. Hansen Bros. is the concrete supplier.

Construction of the tank is scheduled for completion by next July, with landscaping, fencing, and final cleanup completed by October.

If you have any questions or concerns about the project, please feel free to contact me at (530)271-6862 or hobbsd@nidwater.com.

Sincerely,

Doug Hobbs
Project Engineer
